WORK EXPERIENCE

City Government of Lipa (MIS Office) **Lipa City, Batangas, Philippines**

Role: Software Developer Intern **April - June 2026**

As part of an internship with the Lipa City Government's MIS Office, we built a full-stack Scholarship Management Web Application using ASP.NET Core MVC, SQL Server, and Entity Framework Core, incorporating features like role-based permissions, document verification, automated email alerts, and CSV reporting to support scholarship applicants and scholar management. I also collaborated with a development team using Git and GitHub, handling branching, pull requests, and merging conflict resolution to maintain a shared codebase.

EDUCATION

National University - Lipa **Lipa City, Batangas, Philippines**

Bachelor of Science in Computer Science Specialization in Machine Learning **2022-2026**

TECHNICAL SKILLS

Languages and Web Frameworks: Java, JavaScript, TypeScript, PHP, Python, SQL, React, Node.js, Flask, ASP.NET, Flutter

PROJECTS

Student Attendance System Using Deep Learning–Based Facial Recognition **2025**

Developed an automated attendance system using Haar Cascade Classifier for face detection and FaceNet InceptionResNet-V1 for generating facial embeddings. The system uses camera captured images to record attendance on a computer or web-based platform.

Using KNN on Predicting Enrollment Probability for NU Lipa Admission **2025**

A Django-based student admission system for NU Lipa, allowing student registration, admin management, and future ML integration for processing applications.

GIS-Based Mapping of Coffea Liberica Farms in the Province of Batangas **2026**

Developed a GIS-based geo-mapping system for documenting and visualizing the spatial distribution of *Coffea liberica* (Kapeng Barako) farms across Batangas using Google Maps API. Integrated CNN-based plant identification outputs with GPS-tagged farm data to produce an interactive, traceable map of verified Liberica farms in the province.

IP Geolocation Tracker **2026**

A full-stack web app built with React and Node.js that lets users search any IPv4 address and visualize its location on an interactive map. Features JWT authentication, persistent search history, and real-time geolocation lookup via a custom REST API.

EBA Scholarship System **2026**

Built a full-stack scholarship management system for the City Government of Lipa using ASP.NET Core MVC, SQL Server, and Entity Framework Core, with features like role-based access, online applications, and a data visualization dashboard. I also worked with a team using Git/GitHub for code reviews and managing a shared codebase.

CERTIFICATIONS AND PARTICIPATIONS

IC3 Digital Literacy Global Standard Six – CERTIPORT **2025**

Base Build Calabarzon | Certificate of Participation Holder **2025**
